THE Next Wave

A Programme for Young Professionals

Addressing Career Challenges in a Dynamic and Uncertain Energy Landscape

Monday, 21 March 2016 • 0830-1730 hours
Kuala Lumpur Convention Center
Kuala Lumpur, Malaysia

The Next Wave is a programme for energy professionals under the age of 36 or with less than 10 years working experience in the oil and gas industry. This programme offers participants an opportunity to network with seasoned professionals, learn about pressing challenges and opportunities in the industry, and receive guidance on how to make the most of their careers.

Monday, 21 March • 0830-1730 hours • Room 403-404, Level 4

Addressing Career Challenges in a Dynamic and Uncertain Energy Landscape

In 2014, the balance of Energy supply and demand coincided with geopolitical factors and changing market competitive forces to create an epic decline of over 55% of peak oil pricing.

Unlike other Energy Industry downturns, this current cycle has been unpredictable with significant excess global capacity, the USA becoming a global net exporter of shale gas and OPEC's (Organization of the Petroleum Exporting Countries) inability to regulate pricing or control USA's unconventional resource supply. Experts cannot forecast with certainty when the downturn will end, or the price fluctuations nor the new "normal" price of oil, and finally what competitive forces will be at play in the industry going

forward. In effect, it could appear that the business case of the Energy Industry has entered a new era, or has it not?

The global Energy Industry has gone through a layoff of talent. Training, development and hiring plans have been delayed or cancelled due to cost management. What challenges does this pose for Young Professionals (YPs) in the Energy industry and those who were planning to join?

As rig count declined and projects were postponed or cancelled, the new dynamics have brought about great opportunity for Innovation, Efficiency, Technology advancement and entrants of Mergers and Acquisitions. Several companies are reportedly working on cross platform solutions and cost reductions through supply chain and procurement. These new strategies are opening up new opportunities for YPs in the Energy industry. How should YPs prepare themselves to succeed and take advantage of these new opportunities?

The education and skill sets of YPs will have to consider future careers in shale gas and unconventional resources, and careers that will leverage the advancing digital and internet age to drive solutions for the Energy industry, and lastly potential increase of careers in the electrical and alternative energy as part of the traditional Energy Industry.

Given these factors, The Next Wave (TNW) of Energy Industry's leaders who are today YPs have current market challenges to navigate, they might be facing new career dynamics and may require different skill sets from previous generations of Energy industry leaders.

With this new landscape in mind, the 2016 TNW Asia program aims to provide a blueprint for how YPs can understand the new economics and market forces to support them in achieving successful and sustainable careers, whilst ensuring they are able to adapt to the current uncertain business environment. Panel discussions will focus on the emerging trends in the global Energy Industry to provide TNW Asia participants with an appreciation of recent events and support them in building their competitive edge in the Energy Industry workforce.

Preliminary Programme

The programme will include a keynote address on the workshop theme, an executive panel session, a roundtable breakout session and unparalleled networking opportunities:

0800-0845 hours	I.	Committee & Speaker Breakfast
0830-0900 hours	II.	Registration & Welcome Coffee

Keynote Address

0910-1010

Panel Session

1400-1530

DATO' WEE YIAW HIN

Executive Vice President & CEO, Upstream, PETRONAS

Wee Yiau Hin is currently the Executive Vice President & CEO of Upstream Business, PETRONAS. He holds a degree in Civil Engineering from University of Wales and Masters of Science from Imperial College, London.

He joined PETRONAS on May 1st 2010, as Executive Vice-President for E&P Business from Talisman Energy Malaysia where he was the Vice-President. Prior to that, he has had a successful and extensive career with Shell, with his last position as Vice President, Malaysia for Shell Upstream International Asia and Managing Director of Shell Malaysia Exploration and Production Companies. Whilst in Shell, he led the Country Leadership Team in overseeing Shell's upstream operations, and represented the business in the Shell Malaysia Business Council, and has headed various sections in the company's operations in Malaysia, South Africa and the United Kingdom.

Wee Yiau Hin is a member of PETRONAS Board of Directors, Executive Committee, and Management Committee and sits on the Board of several companies within the PETRONAS Group. He was a director of the Northern Asia Pacific Region in the Society of Petroleum Engineers (SPE) from 2009 to 2012, and is now a member of the SPE Asia Pacific Board of Directors.

Panellist

SEE KOK YEW
Chairman,
ExxonMobil Subsidiaries in
Malaysia

Panellist

BRIAN TRUELOVE
Senior Vice President,
Offshore,
Hess

Panellist

DATO' RAIHA AZNI
ABD RAHMAN
Senior Vice President
Group, Human Resource
Management, PETRONAS

Panellist

DATUK IAIN LO
Chairman, Shell Malaysia

Panellist

CRAIG MCMAHON
Head of Research
Asia Pacific,
Wood Mackenzie

Moderator

CHARLES KNOBLOCH
Partner, Arnold,
Knobloch & Saunders

Roundtable Breakout Session

1100-1230

The roundtable breakout sessions provides young professionals a more personal opportunity to discuss their own career development regarding the topics addressed by the keynote speaker and panellists and offers time to consider how they can position themselves around these future industry challenges. These breakouts encourage participation and interactive sharing between attendees and topic facilitators.

Topic	Facilitator
Managing/Leveraging Corporate Politics	Aravindh Kaniappan, Baker Hughes Inc.
Competency Challenges and Current Gaps Specific to the Region and How Young Professionals can Address this	Hazizi Hassan, ExxonMobil E&P Malaysia Inc.
Women in the Business	Penny Chan, PETRONAS Carigali
What are the New Opportunities in the Uncertain Energy Landscape?	Suhana Sidik, PETRONAS
Networking: When, Why and How?	Marina Taib, PETRONAS Carigali
What Recruiters Look for When They View Your LinkedIn Profile	Nurfitriah Mat Noh, Schlumberger
1986, 1998, 2008 and Now – Uncertain Energy Environment, What are the Behaviours and Types of People that Survive the Market 'Hurricane'	Chok Chee Tsong, Shell
Preparing Young Professionals for the 'Age of Accountability'	Simon Ong, Shell
Developing a Successful Business Development Career	Mohd Sharin Saad, Weatherford
